

Sanitary Sewer Cleaning in Progress

Sanitary Sewer Cleaning is taking place in the Municipality throughout the summer. During the sewer cleaning process air within the sewer mains can pressurize. This increase in air pressure can displace the water column in your toilets and may cause a gurgling sound. Sometimes a small amount of water can splash onto your floor. To avoid that potential, residents are advised to keep toilet lids closed when the flushing truck is working on a sewer line/manhole in your neighbourhood.

If you have any questions please call Public Works at 403-563-2220.
